Why Virtual Power Plant

India
SMART UTILITY
Week 2024

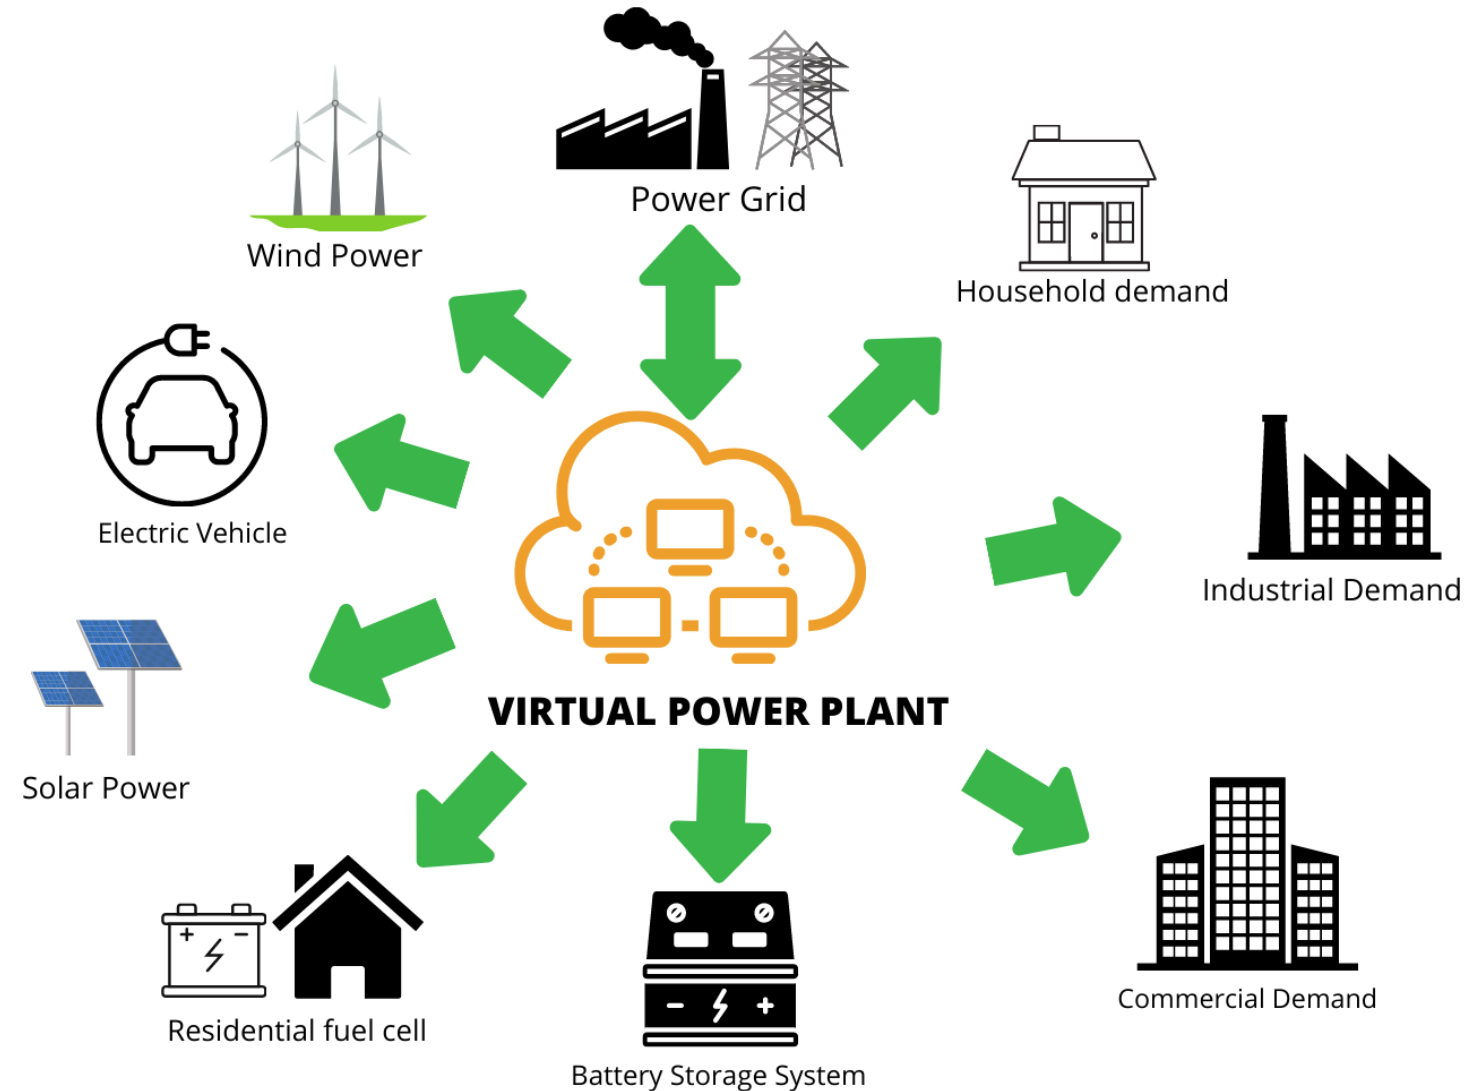

ISGF
India Smart Grid Forum

Current Challenge-

- Various Medium/ small capacity systems.
- Variable and random characteristics
- Reduced capacity compared to the entire power system

Need of Hour-

- Increased renewable & EV Integration
- In BSES Delhi alone-
 - > 163 MW;
 - > 6200 Points

Operation Flexibility in Power System

India
SMART UTILITY
Week 2024

ISGF
India Smart Grid Forum

Parameter	Impact
Active Power	<ul style="list-style-type: none">• Real time balance b/w generation and demand• maintains frequency stability
Reactive Power	<ul style="list-style-type: none">• Maintain voltage levels
Energy requirements	<ul style="list-style-type: none">• Balance b/w generation and demand
Transfer Capacity	<ul style="list-style-type: none">• System Strength

- Active power capacity (π), MW
- Negative values for storage units
- Modulation speed/ Ramp rate (ρ), MW/ min
- Ramp slope (+) or (-) depending on requirement.
- Energy supply (ϵ), MW·h
- Express unit stamina
- Negative values for storage units

Reactive Power Modulation

India
SMART UTILITY
Week 2024

ISGF
India Smart Grid Forum

- Reactive power capacity (ϕ), MVar.
- (+) or (-) depending on technology of each unit.
- Modulation speed/ Ramp rate (ψ), MVar/min.
- Ramp slope (+) or (-) depending on requirement.

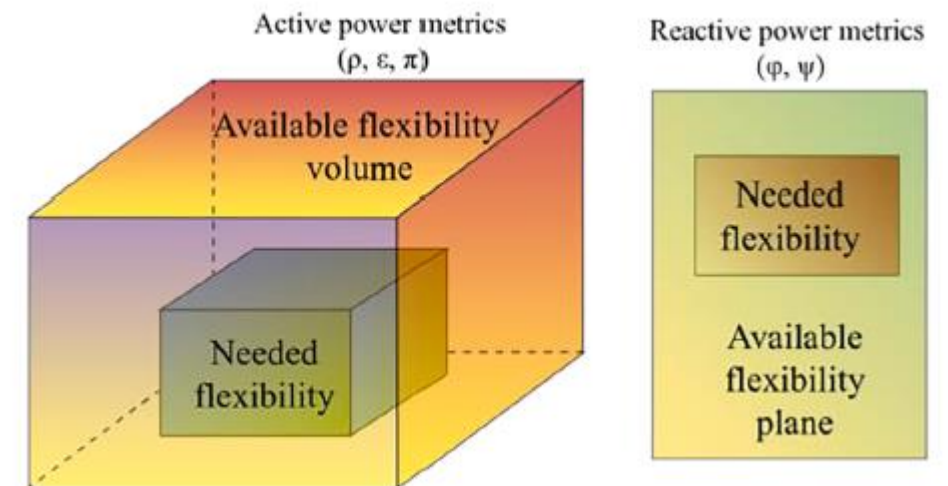

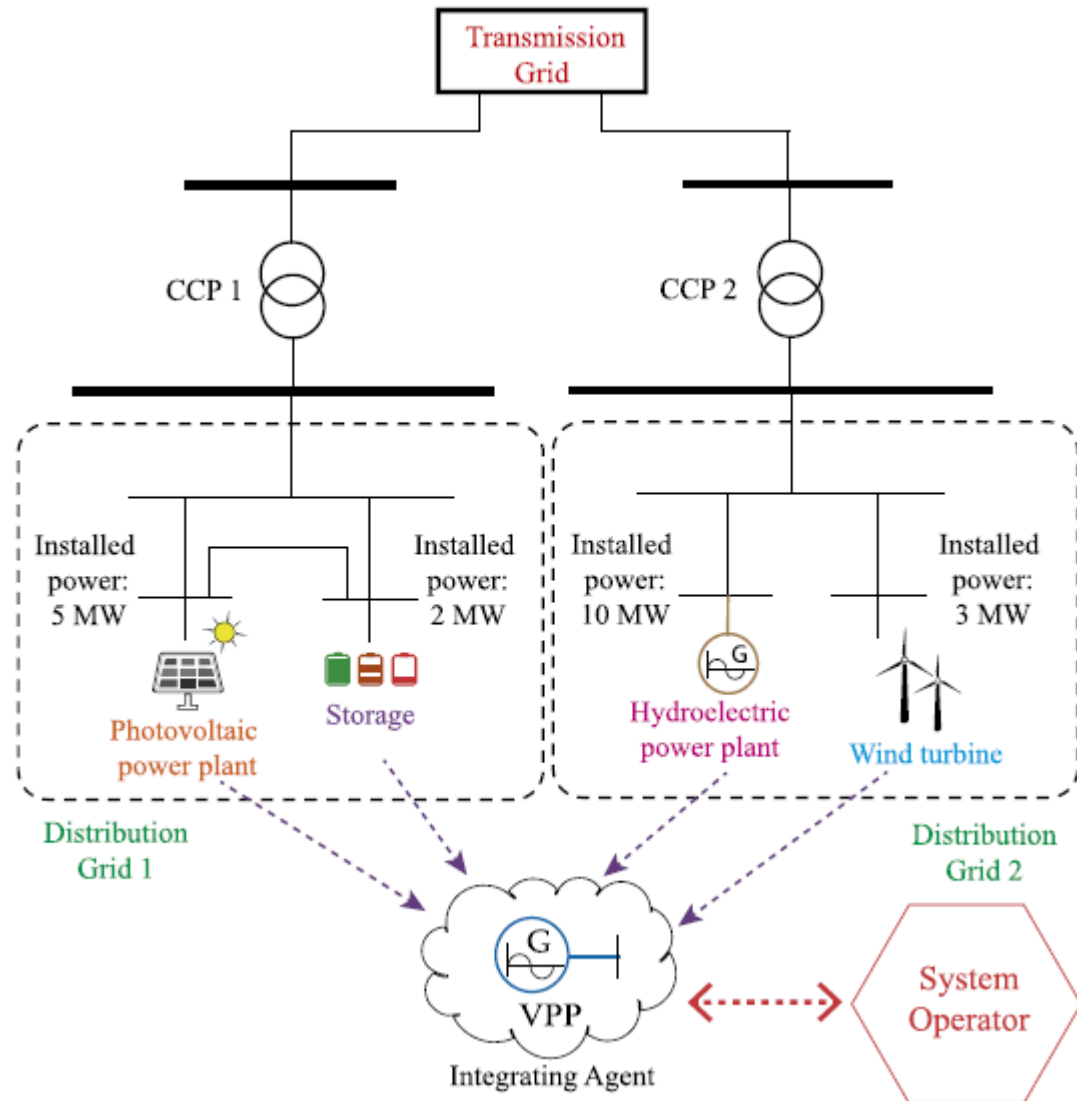

USE CASE

India
SMART UTILITY
Week 2024

ISGF
India Smart Grid Forum

- Cost effective solution
- System Modelling – setting DERs as a single virtual element
- Communication method
 - Smart Metering
 - Distribution automation
- Real-time access for each set of DER.
- DERs to participate in power exchange
- Interoperable Software & systems in interconnectivity domain.

THANK YOU
